# The projet

## Objectives and description

The Social Tech Academy project aims to create a European platform of resources on digital jobs in the social economy and social tech.

This platform will include training courses, thematic webinars, interviews and portraits of professionals, job descriptions and job offers.

Our objective: to provide the keys to entry and orientation in the digital transformation of the social economy in the European Union.

This platform will be operational from 2023. It will be available in four languages: French, Spanish, Italian and English.

## Targets

**People in retraining**
